Application for an Internship

To whom it may concern,

My name is Peter Tomascik, I am a 22 year old, 5th semester international student at CPH Business Academy, where I am specializing in Computer Science. I am very interested in working part-time in a specialized environment for a growing and successful company such as yours. I've been told I am a nice young man with lots of energy and I would love to become a skilled worker in your company. The type of work I will do for you also fits well with my career goals and the experience I gain will help me with the remainder of my studies at CHP Business Academy.

Many of the requirements you seek from a future college graduate are very familiar to me. I have spent a lot of time working with Java, SQL, Git, SCRUM, and UML. This semester, I am also focusing on JavaScript, Ajax, Node and Angular. I am very interested in working with IT-Systems and doing data processing. While in high school, I gained valuable experience in working for a construction and sales oriented company. During this time, I specialized in communications and focused on sales and efficient problem solving.

Last semester, I worked as part of a team to successfully complete various school projects including working with different types of data and databases. I really enjoyed the work we accomplished and can definitely affirm that computer science is very appealing to me and what I would like to do for your company. I am very interested in this part-time position you've offered and hope that you will select me to fill this position. I am excited about the opportunity to show you why I am the best suitable candidate for this position.

In 2010, I was a foreign exchange student for one year at Eagle High School in Eagle, Idaho, United States of America. This was an excellent opportunity for me to further develop my English speaking skills to a higher level than many of my peers. I also learned that I am very suitable to working in a multicultural environment, being flexible, friendly and open-minded. I am also working hard to improve my Danish skills.

In summary, I am very sociable and adept at dealing with various working tasks, many of which come easy for me. Furthermore, I have seen the effect of well-structured teamwork and the importance it plays in the successful accomplishment of results, both here at the academy and in my past work environments. Only when everybody gives his/her best is it possible to accomplish the wanted results.

Please contact me for an interview. I am really looking forward to joining your team.

Thank you for considering my application.

Best Regards,

Peter Tomascik
